Dear Cruise Director,

I enjoy wine with dinner and have heard about "The Aroma Wheel". What is it?

Your taste buds can discern only four flavors - sweet, sour, salt and bitter - while your nose can distinguish thousands of variations. The University of California at Davis came up with 12 major categories, 29 subcategories, and 94 specific terms for the aroma of wine. The original "wheel" was circular, with similar smells placed close together around its circumference.

The more common aromas include: fruity, vegetative, nutty, caramelized, woody, floral, and spicy. Less common aromas include earthy, chemical, sherry, pungent, and even microbiological. Make sure to "swish" the wine in your mouth so all your taste-buds (and your sense of smell) participate in the detection of the wine's finer flavors.
